- Microsoft SQL Express 2008r2 or above

2. Clients

- Windows 7 and above
- Recommended 8 GB RAM
- Minimum 250 GB Hard disk
- Dot Net Framework 4.0 & above

What you Need Before Installation ?

1. Download PKNet Installer from PKNet Website <http://my1port.com/HomePage/SignIn.aspx>
 - ✓ PKNet_FA_Installer.exe
2. Download PKNet Update Manager from Website <http://my1port.com/HomePage/SignIn.aspx>
 - ✓ PKNet_Update_Manager.exe

How to Download The Installer

1. Login to <http://my1port.com/HomePage/SignIn.aspx>
2. Click on **Menu** (Top Left) and click **Maintenance**

Figure 1

3. Click on **License & Installer**

Figure 2

4. Click on **Software Installer** tab, you should see 2 link under Download URL

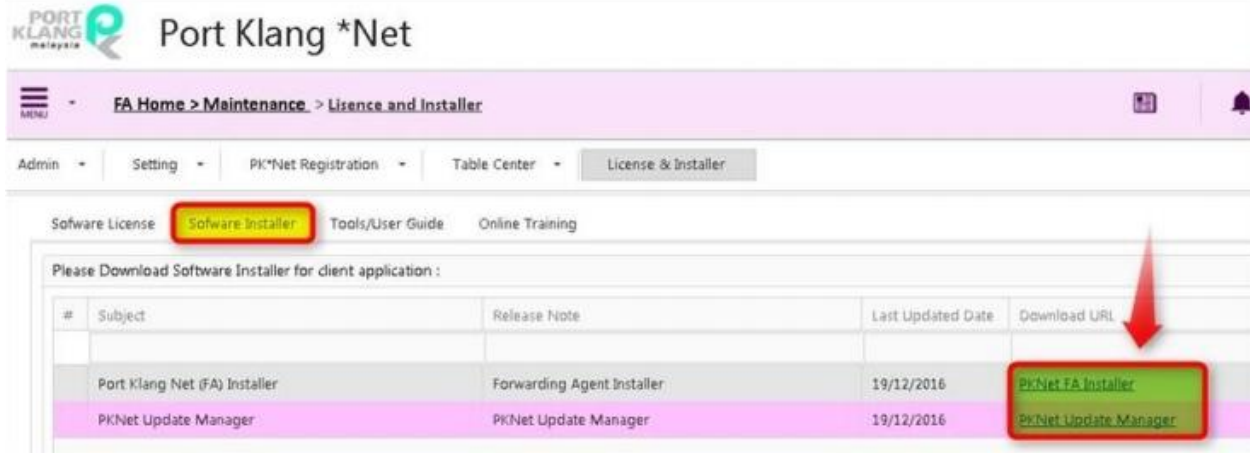

Figure 3

5. Click on the [PKNet FA Installer](#) link (downloading should start when you click on it)
6. Click on [PKNet Update Manager](#) link (downloading should start when you click on it)
7. While waiting for download to finish, you can click on **Tools/User Guide** tab
8. Repeat the same process, click on the below link to start download

[Microsoft.NET Framework 4](#)

[Microsoft SQL Express 2008 R2](#)

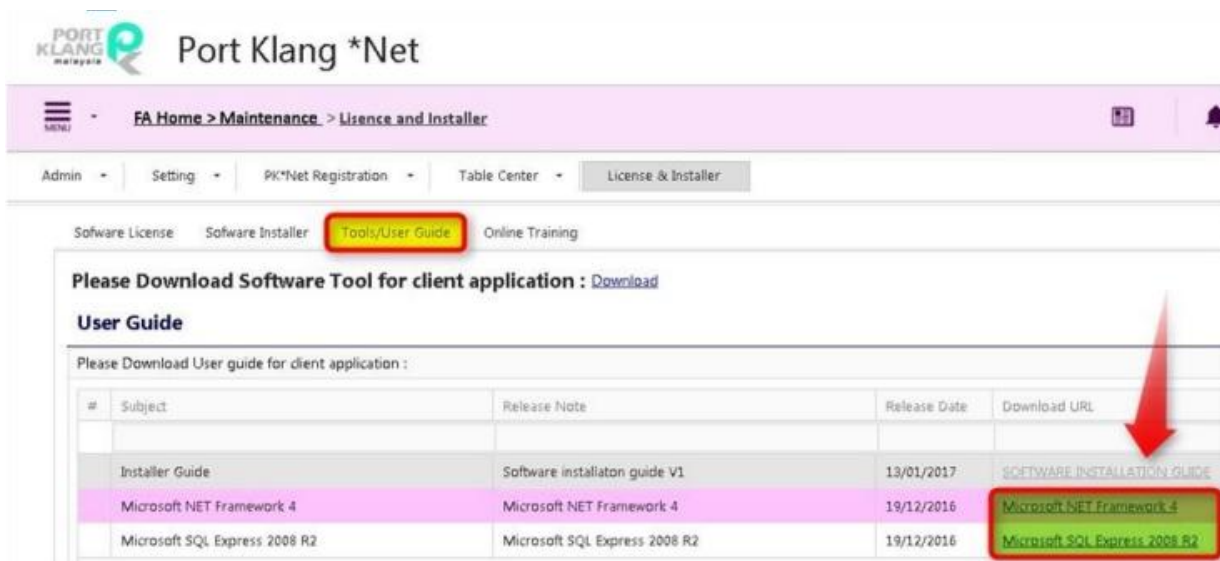

Figure 4

9. Once all the download has completed, it will be listed like this (depending on your browser)

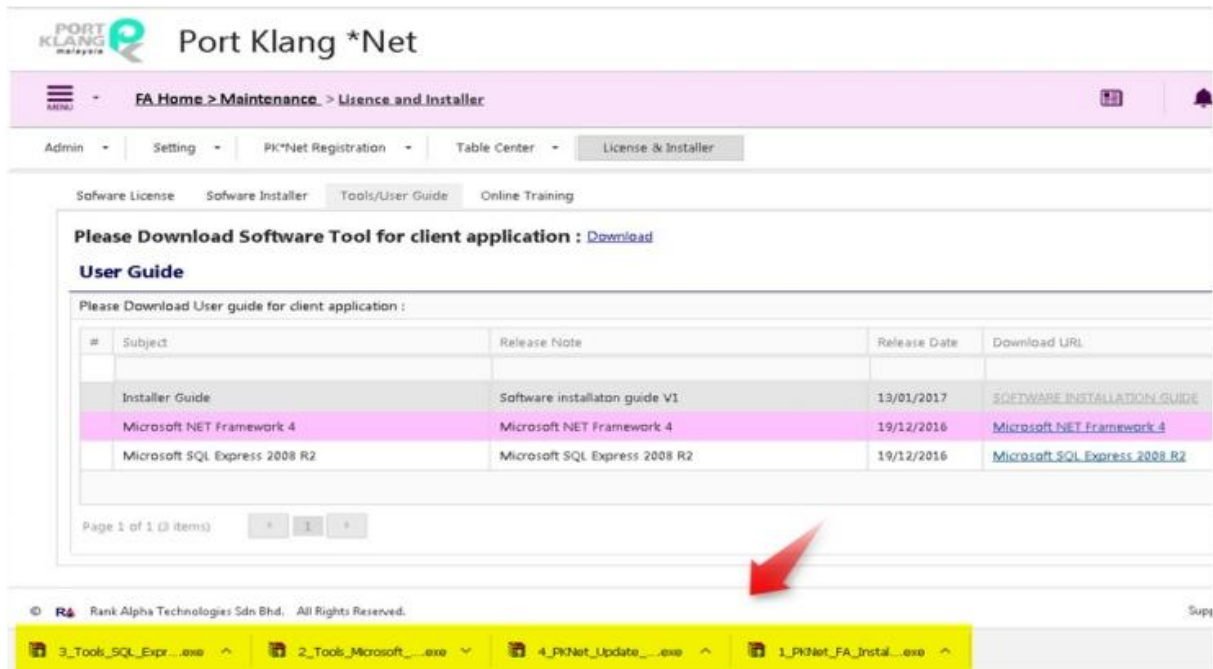

Figure 5

10. Congratulation! This mean your downloading has been completed!

How To Install PKNet System

Please remember to follow the correct sequence accordingly

1. Run or double click on PKNet Installer **PKNet_FA_Installer.exe** to start the installation process.

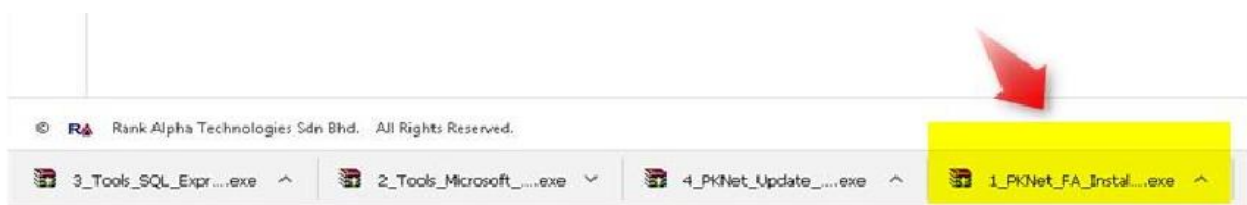

Figure 6

Your Anti Virus might start and scan your installer file first.

2. Depending on your computer, some antivirus will scan it first and just let it finish the scanning.

Figure 7

- When the scan completes, the installer will start to run.

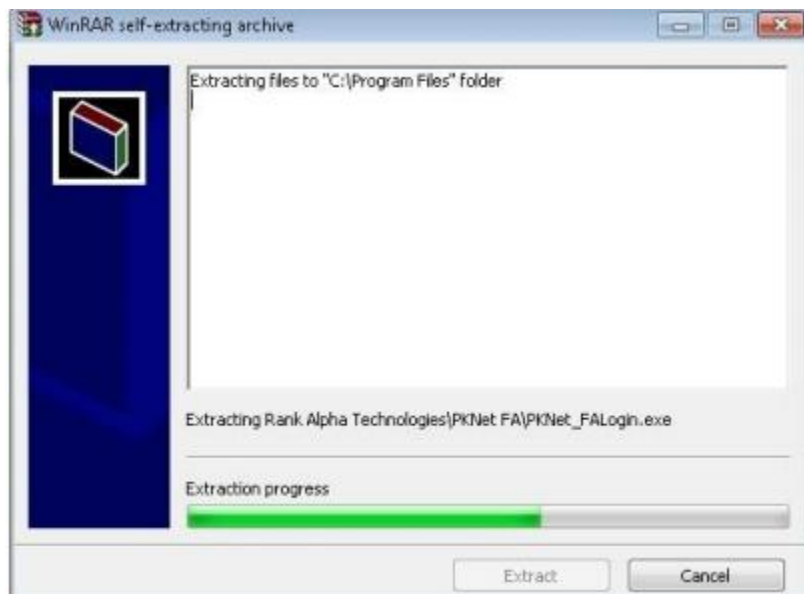

Figure 8

- After the Installation completes, the installation windows will close and you will see a new shortcut created on your desktop.

How To Install PKNet RA Update Manager

1. Run or double click PKNet RA Update Manager, PKNet_Update_Manager.exe

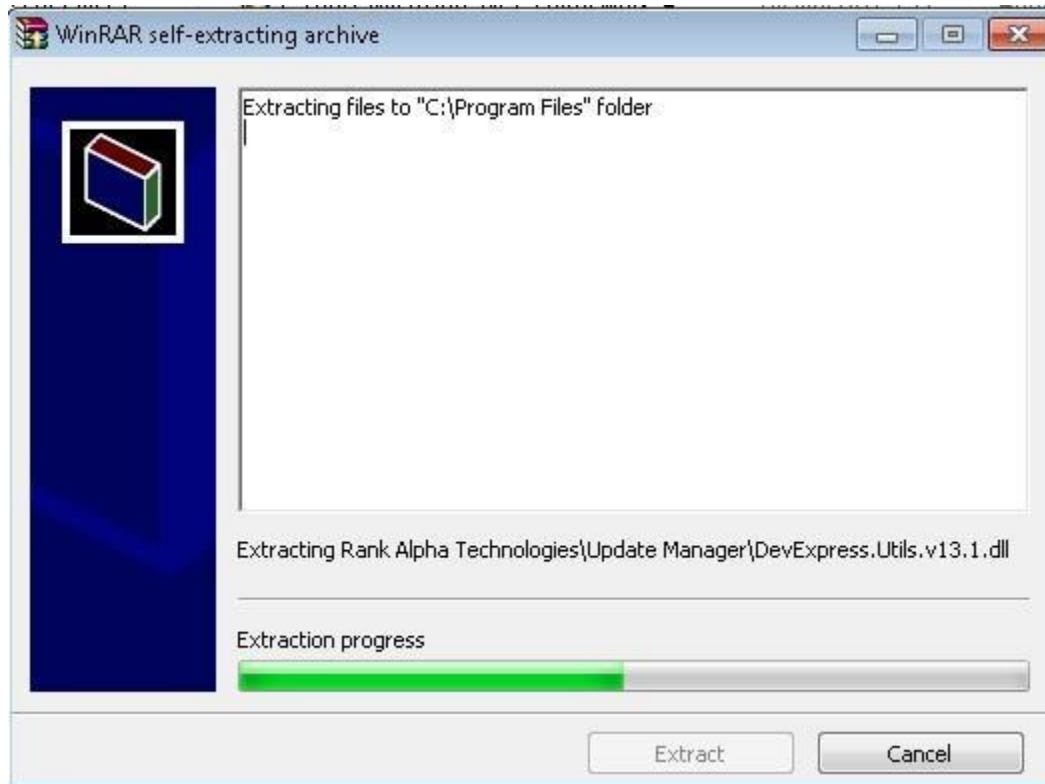

Figure 9

2. Wait until the box disappeared by itself.
3. When it does, means your installation has been completed.
4. You can now enter the system by double click the New Icon created on your desktop
